

MARYLAND Department of Health

Public Health Preparedness and Situational Awareness Report: #2019:14

Reporting for the week ending 04/06/19 (MMWR Week #14)

April 12, 2019

CURRENT HOMELAND SECURITY THREAT LEVELS

National:	No Active Alerts
Maryland:	Normal (MEMA status)

SYNDROMIC SURVEILLANCE REPORTS

ESSENCE (Electronic Surveillance System for the Early Notification of Community-based Epidemics): Graphical representation is provided for all syndromes (excluding the “Other” category; see Appendix 1) by Health and Medical Regions (See Appendix 2). Emergency department chief complaint data is presented as rates per 100,000 residents using data from the 2010 census. Electronic Surveillance System for the Early Notification of Community-Based Epidemics (ESSENCE). Baltimore, MD: Maryland Department of Health; 2019.

(report continues on next page)

Gastrointestinal Syndrome

There were six (6) Gastrointestinal Syndrome outbreaks reported this week: three (3) outbreaks of Gastroenteritis in Nursing Homes (Regions 3,5); three (3) outbreaks of Gastroenteritis in Assisted Living Facilities (Regions 3,5).

Gastrointestinal Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	13.20	15.10	15.86	10.21	13.13
Median Rate*	13.11	14.87	15.46	10.08	12.98

* Per 100,000 Residents

(report continues on next page)

Respiratory Syndrome

There were nine (9) Respiratory Syndrome outbreaks reported this week: one (1) outbreak of Influenza in a Nursing Home (Region 3); one (1) outbreak of Influenza in an Assisted Living Facility (Regions 1&2); one (1) outbreak of Influenza in a Hospital (Regions 1&2); one (1) outbreak of Influenza associated with a Day Program (Region 4); two (2) outbreaks of ILI in Nursing Homes (Region 5); one (1) outbreak of ILI in a Hospital (Region 3); one (1) outbreak of Pneumonia in a Nursing Home (Region 3); one (1) outbreak of Pneumonia in an Assisted Living Facility (Region 5).

Respiratory Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	12.64	14.73	15.07	9.98	12.76
Median Rate*	12.10	14.14	14.35	9.60	12.25

* Per 100,000 Residents

(report continues on next page)

Fever Syndrome

There were no Fever Syndrome outbreaks reported this week.

Fever Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	3.06	3.89	4.09	3.04	3.51
Median Rate*	3.02	3.76	3.97	2.92	3.38

*Per 100,000 Residents

(report continues on next page)

Localized Lesion Syndrome

There were no Localized Lesion Syndrome outbreaks reported this week.

Localized Lesion Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	1.10	1.80	2.03	0.91	1.42
Median Rate*	1.01	1.75	1.99	0.87	1.37

* Per 100,000 Residents

(report continues on next page)

Rash Syndrome

There were no Rash Syndrome outbreaks reported this week.

Rash Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	1.22	1.68	1.76	0.98	1.38
Median Rate*	1.21	1.61	1.77	0.92	1.32

* Per 100,000 Residents

(report continues on next page)

Neurological Syndrome

There were no Neurological Syndrome outbreaks reported this week.

Neurological Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	0.76	0.93	0.84	0.58	0.77
Median Rate*	0.60	0.80	0.66	0.52	0.69

* Per 100,000 Residents

(report continues on next page)

Severe Illness or Death Syndrome

There were no Severe Illness or Death Syndrome outbreaks reported this week.

Severe Illness or Death Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	0.66	0.90	0.83	0.51	0.72
Median Rate*	0.60	0.88	0.66	0.48	0.69

* Per 100,000 Residents

(report continues on next page)

SYNDROMES RELATED TO CATEGORY A AGENTS

Botulism-like Syndrome

There was an appreciable increase above baseline in the rate of ED visits for Botulism-like Syndrome on 3/24 (Region 4), 3/25 (Regions 4,5), 3/26 (Regions 3,4,5), 3/27 (Regions 1&2,3,4,5), 3/28 (Regions 1&2,3,4,5), 3/30 (Regions 3,5), 3/31 (Region 5), 4/1 (Regions 3,5), 4/2 (Regions 1&2,3,5), 4/3 (Regions 1&2,3,5), 4/4 (Regions 3,5), 4/5 (Regions 4,5), 4/6 (Regions 4,5). These increases are not known to be associated with any outbreaks.

Botulism-like Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	0.07	0.12	0.06	0.07	0.09
Median Rate*	0.00	0.07	0.00	0.04	0.07

* Per 100,000 Residents

(report continues on next page)

Hemorrhagic Illness Syndrome

There was an appreciable increase above baseline in the rate of ED visits for Hemorrhagic Illness Syndrome on 3/24 (Regions 3,5), 3/25 (Regions 1&2,3,5), 3/26 (Regions 1&2,3,5), 3/27 (Regions 3,4,5), 3/28 (Regions 3,5), 3/29 (Regions 1&2,5), 3/30 (Regions 4,5), 3/31 (Regions 1&2,3,5), 4/1 (Regions 1&2,3,5), 4/2 (Regions 3,4,5), 4/3 (Regions 1&2,3,5), 4/4 (Regions 3,4,5), 4/5 (Region 3), 4/6 (Regions 1&2). These increases are not known to be associated with any outbreaks.

Hemorrhagic Illness Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	0.04	0.15	0.04	0.12	0.12
Median Rate*	0.00	0.07	0.00	0.09	0.07

* Per 100,000 Residents

(report continues on next page)

Lymphadenitis Syndrome

There was an appreciable increase above baseline in the rate of ED visits for Lymphadenitis Syndrome on 3/24 (Regions 1&2,4,5), 3/25 (Regions 1&2,5), 3/26 (Regions 1&2,3,5), 3/27 (Region 5), 3/28 (Regions 1&2,3,4), 3/29 (Regions 1&2,4,5), 3/30 (Regions 1&2,4), 3/31 (Region 5), 4/1 (Regions 1&2,3,4,5), 4/2 (Regions 1&2,5), 4/4 (Regions 1&2,3,5), 4/5 (Regions 1&2), 4/6 (Region 5). These increases are not known to be associated with any outbreaks.

Lymphadenitis Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	0.36	0.58	0.40	0.37	0.46
Median Rate*	0.20	0.47	0.44	0.31	0.40

* Per 100,000 Residents

(report continues on next page)

MARYLAND REPORTABLE DISEASE SURVEILLANCE

Reportable disease data from the National Electronic Disease Surveillance System (NEDSS) that feeds into ESSENCE is currently being validated. We will include these data in future reports once the validation process is complete.

(report continues on next page)

SYNDROMIC INFLUENZA SURVEILLANCE

Seasonal Influenza reporting occurs from MMWR Week 40 through MMWR Week 20 (October 2018 through May 2019). Seasonal Influenza activity for Week 14 was: Minimal Intensity and Widespread geographic activity.

Influenza-like Illness

Influenza-like Illness Baseline Data Week 1 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	10.22	13.36	12.93	11.31	12.28
Median Rate*	7.66	10.23	9.27	8.73	9.32

* Per 100,000 Residents

(report continues on next page)

Influenza-like Illness Contacts by Week

Disclaimer on eMEDS flu related data: These data are based on EMS Pre-hospital care reports where the EMS provider has selected “flu like illness” as a primary or secondary impression of a patient’s illness. This impression is solely based on the signs and symptoms seen by the provider, not on any diagnostic tests. Since these numbers do not include all primary or secondary impressions that may be seen with influenza the actual numbers may be low. These data are reported for trending purposes only.

(report continues on next page)

Over-the-Counter Influenza-Related Medication Sales

There was not an appreciable increase above baseline in the rate of OTC thermometer sales during this reporting period.

OTC Medication Sales Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	3.60	4.64	2.74	8.07	5.72
Median Rate*	2.82	3.84	2.43	7.38	5.00

* Per 100,000 Residents

(report continues on next page)

Over-the-Counter Thermometer Sales

There was not an appreciable increase above baseline in the rate of OTC thermometer sales during this reporting period.

Thermometer Sales Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	3.07	2.93	2.32	3.89	3.26
Median Rate*	2.82	2.78	2.21	3.75	3.15

* Per 100,000 Residents

(report continues on next page)

SYNDROMIC OVERDOSE SURVEILLANCE

The purpose of this section is to characterize non-fatal ED visit trends for acute unintentional overdose by Heroin, Opioid or Unspecified substance among Maryland residents captured by ESSENCE data, including chief complaint and discharge diagnosis. ED visits that are identified as unintentional overdose by Heroin, Opioid or Unspecified substance include those with medical and non-medical use of a prescription Opioid or where the substance is not specified, given evidence that most fatal overdoses are Opioid-related.

In preparation for the release of new ESSENCE queries for identifying heroin, opioid and all drug overdoses, please note that we have removed the data chart showing unintentional overdose rates by heroin, opioid, or unspecified substances. These new data, when available, will be presented below.

(report continues on next page)

Naloxone Administration Data by Week

Disclaimer on eMEDS naloxone administration related data: These data are based on EMS Pre-hospital care reports where the EMS provider has documented that they administered naloxone. The administration of naloxone is based on the patient's signs and symptoms and not on any diagnostic tests. These data are reported for trending purposes only.

(report continues on next page)

Naloxone Administration Data

Disclaimer on eMEDS Naloxone administration related data: These data are based on EMS Pre-hospital care reports where the EMS provider has documented that they administered naloxone. The administration of naloxone is based on the patient's signs and symptoms and not on any diagnostic tests. These data are reported for trending purposes only.

PANDEMIC INFLUENZA UPDATE / AVIAN INFLUENZA-RELATED REPORTS

WHO update: The current WHO phase of pandemic alert for avian influenza is ALERT. Currently, the avian influenza H5N1 virus continues to circulate in poultry in some countries, especially in Asia and northeast Africa. This virus continues to cause sporadic human infections with some instances of limited human-to-human transmission among very close contacts. There has been no sustained human-to-human or community-level transmission identified thus far.

Influenza A (H7N9) is one of a subgroup of influenza viruses that normally circulate among birds. Until recently, this virus had not been seen in people. However, human infections have now been detected. Presently, there is limited information about the scope of the disease the virus causes and about the source of exposure. The disease is of concern because most patients have been severely ill. There is no indication thus far that it can be transmitted between people, but both animal-to-human and human-to-human routes of transmission are being actively investigated.

Alert phase: This is the phase when influenza caused by a new subtype has been identified in humans. Increased vigilance and careful risk assessment, at local, national, and global levels are characteristic of this phase. If the risk assessments indicate that the new virus is not developing into a pandemic strain, a de-escalation of activities towards those in the interpandemic phase may occur. As of April 11, 2019, the WHO-confirmed global total (2003-2019) of human cases of H5N1 avian influenza virus infection stands at 860, of which 454 have been fatal. Thus, the case fatality rate for human H5N1 is approximately 53%.

AVIAN INFLUENZA

AVIAN INFLUENZA (BULGAIRA), 04 Apr 2019, Bulgaria's food safety agency authorities reported on [Wed 3 Apr 2019] an outbreak of the bird flu virus on a duck farm in the village of Yoglav in central Bulgaria and said birds on the farm were being culled. A 3 km [1.8 mi] protection zone had been set around the farm and the movement of domestic, wild and other birds and has been banned within it, as has the sale of eggs and poultry, the food safety agency said in a statement. Read More: <http://www.promedmail.org/post/6404400>

HUMAN AVIAN INFLUENZA

AVIAN INFLUENZA, HUMAN (CHINA), 06 April 2019, Officials with the National Health Commission in China have reported the 1st human case of avian influenza A(H7N9) this year [2019] in Gansu. The male patient, age 82 years, from Jiuquan has been hospitalized and is in serious condition. Read More: <http://www.promedmail.org/post/6407503>

NATIONAL DISEASE REPORTS

MEASLES (MULTISTATE), 30 Mar 2019, The US Centers for Disease Control and Prevention (CDC) recorded 78 more measles cases in the last week [1-7 Apr 2019], a sign that ongoing outbreaks in several states are growing. Arizona, California, Colorado, Connecticut, Florida, Georgia, Illinois, Indiana, Kentucky, Massachusetts, Michigan, Missouri, Nevada, New

Hampshire, New Jersey, New York, Oregon, Texas, and Washington have all recorded cases. The 2019 total number of cases has jumped to 465 in 19 states, as Florida, Indiana, Massachusetts, and Nevada all reported their first cases of the year [2019] last week. Read More: <http://www.promedmail.org/post/6414559>

INTERNATIONAL DISEASE REPORTS

UNDIAGNOSED RESPIRATORY ILLNESS (GUYANA), 08 Apr 2019, Health officials in Guyana have reported a leptospirosis outbreak among Guyana Manganese Inc. (GMI) workers on 5 Apr 2019. According to authorities, two Chinese nationals have been treated and released, while another mining employee, who was also tested positive for leptospirosis, is in "critical but stable condition". One individual died from complications associated with leptospirosis on 3 Apr 2019 night while undergoing treatment at the Georgetown Public Hospital Corporation (GPHC). Read More: <http://www.promedmail.org/post/6410885>

SALMONELLOSIS (CANADA), 07 Apr 2019, The Public Health Agency of Canada is collaborating with provincial public health partners, the Canadian Food Inspection Agency and Health Canada to investigate an outbreak of salmonella infections [*S.* Enteritidis] involving 6 provinces: British Columbia, Alberta, Saskatchewan, Manitoba, Ontario and Quebec. The source of the outbreak has not been identified, and the investigation is ongoing. Outbreak investigators are gathering information on possible sources. The outbreak appears to be ongoing, as illnesses continue to be reported. The Public Health Agency of Canada is issuing this public health notice to inform Canadians of the investigation findings to date and to share important safe food handling practices to help prevent further salmonella infections. NOTE: This weekly review is a compilation of data from various surveillance systems, interpreted with a focus on a potential BT event. It is not meant to be inclusive of all epidemiology data available, nor is it meant to imply that every activity reported is a definitive BT event. International reports of outbreaks due to organisms on the CDC Critical Biological Agent list will also be reported. While not "secure", please handle this information in a professional manner. Please feel free to distribute within your organization, as you feel appropriate, to other professional staff involved in emergency preparedness and infection control.

For questions about the content of this review or if you have received this and do not wish to receive these weekly notices, please e-mail us. If you have information that is pertinent to this notification process, please send it to us to be included in the routine report.

Appendix 1: ESSENCE Syndrome Definitions and Associated Category A Conditions

Syndrome	ESSENCE Definition	Category A Conditions
Botulism-like	(Botulism or (DifficultyFocusing and DifficultySpeaking) or (DifficultySpeaking and DifficultySwallowing) or (DifficultySwallowing and DifficultyFocusing) or DoubleVision or FacialParalysis or GuillainBarre or Ptosis) and not GeneralExclusions	Botulism
Fever	(Chills or (FeverPlus and (Drowsiness or Seizure)) or FeverOnly or SepsisGroup or ViralSyndrome) and not GeneralExclusions	N/A
Gastrointestinal	(AbdominalCramps or AbdominalPainGroup or Diarrhea or FoodPoisoning or Gastroenteritis or GIBleeding or Peritonitis or Vomiting) and not (GeneralExclusions or Gynecological or Obstetric or Reproductive or UrinaryTract)	Anthrax (gastrointestinal)
Hemorrhagic Illness	(FeverOrChills and (AcuteBloodAbnormalitiesGroup or BleedingFromMouth or BleedingGums or GIBleeding or Hematemesis or Hemoptysis or Nosebleed or Petechiae or Purpura)) and not GeneralExclusions	Viral Hemorrhagic Fever
Localized Lesion	(Boils or Bump or Carbuncle or DepressedUlcer or Eschar or Furuncle or InsectBite or SkinAbscess or (SkinSores and not AllOverBody) or SkinUlcer or SpiderBite) and not (GeneralExclusions or Decubitus or Diabetes or StasisUlcer)	Anthrax (cutaneous) Tularemia
Lymphadenitis	(BloodPoisoning or Bubo or CatScratchDisease or SwollenGlands) and not GeneralExclusions	Plague (bubonic)
Neurological	(([Age<75] and AlteredMentalStatus) or (FeverPlus and (Confusion or Drowsiness or Petechiae or StiffNeck)) or Delirium or Encephalitis or Meningitis or UnconsciousGroup) and not GeneralExclusions	N/A
Rash	(ChickenPox or Measles or RashGeneral or Roseola or (Rubella and not Pregnancy) or Shingles or (SkinSores and AllOverBody) or Smallpox) and not GeneralExclusions	Smallpox
Respiratory	(Anthrax or Bronchitis or (ChestPain and [Age<50]) or Cough or Croup or DifficultyBreathing or Hemothorax or Hypoxia or Influenza or Legionnaires or LowerRespiratoryInfection or Pleurisy or Pneumonia or RespiratoryDistress or RespiratoryFailure or RespiratorySyncytialVirus or RibPain or ShortnessOfBreath or Wheezing) and not (GeneralExclusions or Cardiac or (ChestPain and Musculoskeletal) or Hyperventilation or Pneumothorax)	Anthrax (inhalational) Tularemia Plague (pneumonic)
Severe Illness or Death	CardiacArrest or CodeGroup or DeathGroup or (Hypotension and FeverPlus) or RespiratoryArrest or SepsisGroup or Shock	N/A

Appendix 2: Maryland Health and Medical Region Definitions

Health and Medical Region	Counties Reporting to ESSENCE
Regions 1 & 2	Allegany County Frederick County Garrett County Washington County
Region 3	Anne Arundel County Baltimore City Baltimore County Carroll County Harford County Howard County
Region 4	Caroline County Cecil County Dorchester County Kent County Queen Anne's County Somerset County Talbot County Wicomico County Worcester County
Region 5	Calvert County Charles County Montgomery County Prince George's County St. Mary's County
